Baloo the Builder Workshop

Revised April 8, 2021

This workshop is designed to allow Cub Scouts to complete the Baloo the Builder requirements in a single session lasting approximately 2 to 2 ½ hours. Dens seeking a shorter activity can arrange a Den Activity focused on a single project, which generally takes 1 to 1 ½ hours to complete. A parent is expected to attend with their Cub Scout(s) and to guide/assist as needed. The activity schedule below is based on our current target of 4 youth per work session. When Covid restrictions are lifted, the schedule will be re-worked to accommodate 6 to 8 youth per work session. We can arrange multiple sessions to accommodate larger Dens. The cost of this activity is \$12/youth, with the projects included below. If desired, alternative projects may be substituted. The use of alternative projects may impact the time required and the cost of the activity.
