|----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Woodworking<br/>101</b></p> <p>Instructor<br/>CJ Staton</p>          | <p><b>Introduction to Woodworking</b><br/>This class introduces Scouts and adults to woodworking; taking them through the entire process from making lumber to a completed project. It is a great course for anyone who would like to learn about shop tools and develop basic woodworking skills.<br/>View the <a href="#">Class Syllabus</a> for more details.</p>              | <p><b>Ages:</b> Youth 11+ &amp; Adults<br/><b>Class size:</b> 6<br/><b>Cost:</b> \$10/person</p>                                                                                                                                 |
| <p><b>Tool<br/>Restoration</b></p> <p>Instructor<br/>Dan Nellis</p>        | <p><b>Tool Restoration Workshop</b><br/>Good quality tools or equipment can become damaged by rust or corrosion. This class will demonstrate restoration techniques as well as preventative measures that can be taken to prevent this damage.<br/>View the <a href="#">Class Syllabus</a> for more details.</p>                                                                  | <p><b>Ages:</b> Youth 13+ &amp; Adults<br/><b>Class size:</b> 6<br/><b>Cost:</b> \$10/person<br/><br/><b>Bring:</b> One hand tool requiring restoration</p>                                                                      |
| <p><b>Classic<br/>Doll Bed</b></p> <p>Instructor<br/>Soup Fick</p>         | <p><b>Classic Doll Bed Workshop</b><br/>This project begins with an introduction to shop machines and hand tools and ends with creating a doll bed that measures 12W" x 8"H x 22"L. Build one for yourself or build one as a gift. Either way, this Classic Doll Bed will be treasured for years to come.<br/>View the <a href="#">Workshop Description</a> for more details.</p> | <p><b>Ages:</b> Youth 11+ &amp; Adults<br/><b>Structure:</b> Work Pair (parent/Scout, Scout siblings, Scout buddies)<br/><b>Class size:</b> 3 Work Pairs<br/><b>Cost:</b> \$20/Work Pair (1 bed)<br/>\$27/Work Pair (2 beds)</p> |
| <p><b>Woodworking<br/>201</b></p> <p>Instructor<br/>CJ Staton</p>          | <p><b>Router Skills Workshop</b><br/>This course introduces students to basic router operation and safety. It also introduces various joint, inlay and edge shaping bits, jigs and techniques. Students will learn and apply skills while creating their own project.<br/>View the <a href="#">Workshop Description</a> for more details</p>                                      | <p><b>Ages:</b> Youth 16+ &amp; Adults<br/><b>Class size:</b> 6<br/><b>Cost:</b> \$15/person<br/><b>Prerequisites:</b> Basic woodworking skills, comfort with power tools, adequate strength to control the router</p>           |
| <p><b>Workbench<br/>Design</b></p> <p>Instructor<br/>Mike Pierce</p>       | <p><b>Workbench Design Class</b><br/>The workbench is the heart of every wood shop. From design and layout to assembly and finishing, a workbench gets constant use. This course focuses on features and design considerations to incorporate into your own workbench design. Class Syllabus pending.</p>                                                                         | <p><b>Ages:</b> Youth 14+ &amp; Adults<br/><b>Structure:</b> Work Pair (parent/Scout, Scout siblings, Scout buddies)<br/><b>Class size:</b> 3 Work Pairs<br/><b>Cost:</b> \$12/Work Pair</p>                                     |
| <p><b>Workbench<br/>Construction</b></p> <p>Instructor<br/>Mike Pierce</p> | <p><b>Workbench Construction</b><br/>Supervised shop time to review final design questions and to cut components for your workbench with full or partial assembly. Each Work Pair should bring their completed design(s) and will also need to bring materials required for their workbench.</p>                                                                                  | <p><b>Ages:</b> Youth 14+ &amp; Adults<br/><b>Class size:</b> 2 Work Pairs<br/><b>Cost:</b> \$20/Work Pair<br/><b>Prerequisite:</b> Design Class</p>                                                                             |
