Baloo the Builder Workshop

Revised Jan, 2024

This workshop is designed to allow Bears to complete the Baloo the Builder requirements in a single session lasting 2 to 2 ½ hours. Dens seeking a shorter activity can arrange an activity focused on a single project, which generally takes 1 to 1 ½ hours to complete. Parents are expected to attend and to guide/assist as needed. We target 6 to 8 youth per work session. We can arrange multiple sessions to accommodate larger Dens. The cost of this activity is \$13.50/youth, with the projects included below. If desired, alternative projects may be substituted which may impact the time required and the cost of the activity. Dens of 3 or more may reserve an evening session (Mon-Thur) and Dens of 4 or more may reserve weekend times. Individual Cub Scouts or smaller groups can sign up for an Open Registration Session.
